

## Expanded Food and Nutrition Education Program EFNEP Social Media Committee

Social Media Committee Update  
November 2016

The committee is making great progress with an updated website to host social media resources, education and training, and our updated toolkit. We expect the beta site to launch in early 2017 and will continue to add new content to help support the use of social media and technology in EFNEP (and SNAP-Ed) programs across the nation. We have offered hosting materials from the EFNEP Technology Committee, as we are working closely to support innovative use of technology and social media in EFNEP.

Our full committee meeting schedule is every other month and will be more of a forum for discussion, state updates, and Q&A. We will have more frequent working group meetings for specific projects (currently working on the website). Our next full committee meeting is December 13<sup>th</sup> at 3pm Eastern via [WebEx](#). Please join us if you are interested in our work or want to see the new website.
