Dear Friend,

We hope you enjoy the popular recipes found in this cookbook. This is a small sampling of favorite foods shared during Expanded Food and Nutrition Education Program (EFNEP) classes over the past 50 years. The recipes in this collection come from many of the universities operating EFNEP in each state, the District of Columbia and in six U.S. territories. This collection may remind you of a family cookbook, since several recipes include a comment or story that was shared by a participant or a peer educator.

Help us celebrate 50 years and enjoy sharing these recipes with your family and friends!

Apple Cinnamon Wrap and Roll

INGREDIENTS

- 3 Tbsp. Sugar
- 1 Tsp. Cinnamon
- 2 Apples (2 c. chopped)
- 1/3 Cup Low-fat Vanilla Yogurt
- 4 Medium (6-inch) Flour Tortillas
- 3 Tsp. Vegetable Oil

INSTRUCTIONS

Mix sugar and cinnamon in a small bowl. Pour 1 tsp. of oil in a saucer.

Wash and chop apples into small pieces. Place in medium bowl.

Add yogurt to apples, stirring to combine.

Lay tortilla flat on plate. Use fingers to lightly coat top side with oil. Sprinkle it with a spoonful of cinnamon sugar mixture.

Turn tortilla over so un-oiled side is up. Put 1/4 c. of the apple mixture, on half of the tortilla, folding the other tortilla half over the mixture.

Heat 2 tsp. oil in frying pan on medium.

Place folded tortilla in pan and cook about 1 minute, or until lightly browned. Flip to cook second side. (if oil starts to smoke, remove pan from burner for a minute and then continue.)

Remove from pan and cut in half.

Repeat with remaining tortillas.

Apple Cinnamon Wrap and Roll has been a favorite of educators and participants since our Get Fresh campaign was launched in NY in the early 2000s. This was an effort to increase traffic at farmers markets, promote consumption of locally produced fruits and vegetables, and promote use of farmers' markets coupons across the state. This recipe was also a perfect vehicle to promote NY state apples. Cornell has developed 65 different apple varieties over the years. The newest - SnapDragon and RubyFrost were released in 2013. NYS is #2 in apple production. The recipe is easy to prepare, requiring minimal kitchen equipment, uses ingredients easily found, and can be eaten warm or held and eaten at room temperature.

Kids like cookies, and this is a good way to get them thinking about different cookie flavors, and that when they cook for themselves they can make changes like adding/omitting raisins and nuts into recipes like this. This is a great recipe to use to brainstorm with kids flavors or other things that would go well in these cookies.

'It's cool and yummy- just what I needed on a hot day.'

Yogurt and fermented milk products have been consumed in India, Pakistan, Bangladesh, Iran, Turkey and Egypt from time immemorial. Fresh milk spoils in the heat of these hot, dry countries very rapidly. So milk is fermented to yogurt, which then is churned or blended with fruit, and a little honey or sugar is added to produce a refreshing light drink that protects from heat and dehydration. Lassi is pronounced "lussie," not "lassie," and is the name used in India/Pakistan. A salted version also is consumed in many countries.

It's really fun and simple to prepare, is surprising and tastes delicious. The kids are always amazed they taste so good with spinach. Easy to prepare, transport, and store. Everyone loves it and it is such a cool color. People are thrilled to be able to get greens in a tasty way. It is very flexible as chard, kale, or lettuce greens could be subbed for the spinach. And the other ingredients many will have on hand. The bright green color makes people very curious (and skeptical) but when they taste it, they love it. So fun!

The Trail Mix recipe is one of my go to recipes for youth. I leave out the peanuts due to food allergies with so many children. It's a great recipe for introducing them to dried fruit such as dried cranberries (craisins), raisins, dried cherries and other dried fruit. The recipe is easy for the youth participants to prepare and it's always a hit with my classes.

So many of my youth participants have never had dried cranberries (craisins) before. So many of them have really enjoyed tasting the dried cranberries and stated they made the trail mix one of their favorite snacks I have served in our classes.

Native Americans in our region celebrate by sharing food, such as fruit. Wojapi (woo-jha-pee) is a fruit pudding made from cooking the fruit that was gathered in the wild to make a thickened sauce. Fruit included chokecherries, plums or wild strawberries sweetened with honey. Today this food item is served with bread at celebrations such as powwows, or wacipi (wah-chee-pee), and give-aways. This is a very simple version that children can make at home in the microwave oven.

Pumpkin and Red Lentil Stew is a unique way to use legumes available through WIC, as well as pumpkin or other winter squash, which are ubiquitous in Vermont during fall and early winter. The curry spice has been popular with families and this recipe is often the first time they've used it at home in their own cooking. It's a recipe that we added in 2015 to incorporate more flavors from around the world.

Maple Glazed Carrots are a participant favorite. Vermont is the No. 1 maple producer in the U.S., making it an essential component in pretty much every kitchen. Carrots are a low-cost vegetable year round, and this tasty recipe introduces families to another way of preparing them. The recipe was modified from Martha Stewart's Mad Hungry. We added it to our collection in 2015 to highlight roasting as a way to enhance the flavor of vegetables.

I first learned of the recipe from Kansas Lean, a state nutrition education coalition that worked on the reduction of chronic disease. It continues to be a popular recipe for me and my nutrition assistants. We often use it at our introductory classes as it is easy and uses ingredients that clients usually have on hand.

This can be an easy mix and serve recipe if frozen fruit or chilled canned fruit is used. The dry instant pudding makes a nice sauce for the salad. No sugar added instant pudding can be used and you can also cut the amount of dry pudding in half and still have a light sauce. Clients say that they will make it again at home for their family and many take it to pot lucks and family get togethers.

This recipe was developed for Grandfamilies to encourage the families to eat more vegetables.

One of the grandchildren, 4-years-old, had never been exposed to vegetables prior to coming to live with her grandparents. When this demonstration was completed and it was time for tasting, she tasted and ate a small serving. She wanted more!

This recipe is one of my favorites to use as a food demonstration during EFNEP programming. There is always a need to encourage vegetable consumption whether raw or cooked. The recipe is packed with a variety of vegetables, easy to prepare, high in nutrition, smells great while cooking and is versatile. Children can also help prepare by washing the vegetables. This recipe is an anytime recipe.

I have had several families call me for this recipe, telling me that family members that didn't eat a lot of vegetables will eat the pot pie.

Nutrition education assistants often conduct classes that include a hands-on recipe activity. During one class, the participants were preparing their own Easy Chicken Pot Pie when one of the parents stated that her child would not eat it because the child didn't like many vegetables or items that were mixed and cooked together. The assistants told the parent to not say anything to the child or to tell the child it's a new recipe that they may want to try, and just let them decide if they would like to try it. The child decided to try it and ate more than half of it. The mother called to say the recipe was a big hit in her house and they would be making it again.

This was a long-time family recipe of the Cleek family. Shirley W. Cleek was an EFNEP PA in Arkansas from 1987-2007. Keith Statham-Cleek (her son) is currently the EFNEP Manager for the State of Arkansas.

This was a quick and easy recipe my family loved for years. In the late 80's clients often received canned pulled pork in their commodities. We adapted this recipe to use the canned pork. We used to teach people how to make their own baking mix, we called them Master Mixes. This was a big hit with our Arkansas EFNEP families. We have since adapted it to use ground turkey.

"Lentils first arrived on the Palouse in 1916 when Farmington native, J. J. Wagner, asked a local Seventh Day Adventist pastor to order seed from Europe. Wagner then planted two test rows on his farm to see if lentils would grow in the semi-arid environment. And grow they did. With the advent of mechanized harvesting equipment a few years later, lentil production continued to increase. Today, over 95 percent of the nation's lentils are grown on the Washington-Idaho Palouse prairie."

My participants always love the Mini Meatloaf recipe. They are shocked at how easy this is to make and say they and their kids make it often.

Meatloaf is one of those foods that can be a healthy, easy main dish and a way to increase the amount and variety of veggies in meals, but many participants were not utilizing this dish because of the length of time to make. North Carolina EFNEP Educators, Volunteers, and Professionals came up with this version to make this a simple, easy dish that many participants state is a family favorite. You can add different vegetables to the meatloaves depending on what you have available and the recipe lends itself to changing the flavor profile by changing the seasonings.

"The chopping of the vegetables was easy and everything after that was just cook and stir."

J. Chambers, EFNEP participant

Most chili recipes require a full-day commitment in the kitchen. This FNP recipe for Quick Chili Con Carne is very simple, healthful and quick. It offers the full and hearty flavor of an all-day prepped chili but in a time-saving manner. A current participant in the EFNEP program at Virginia State University was able to prepare the chili quickly, was enthusiastic about sharing it with a family member, and snapped a few photos of her completed recipe. The picture of her recipe also has been shared on our social media page; Facebook.

Place fish fillets in the skillet. Cook over medium heat for 1½ minutes until golden brown, flip and cook another 1½ minutes until golden brown on the other side. Pour the lemon juice mixture over the fish. Cook for another one to two minutes. When the fish flakes easily with a fork, it is done. Break the fish into bite-sized pieces. Fill tortillas with fish and top with a bit of the sour cream mixture. Top with shredded cabbage, diced tomato and a squeeze of fresh lime (if using). Refrigerate leftovers within two hours. Eat within three to five days.

This recipe was adapted to utilize dried cherries, which became a commodity available to us as a TEFAP agency. Graduates of EFNEP receive a bag of nonperishable TEFAP upon completion of the program. When plumped with warm water, the dried cherries extend the sensation of meat in this type of recipe. We also use the recipe when discussing MyPlate because it has an item from each of the food groups.

Staff are amazed at how the plumped cherries can be used in a variety of dishes such as this dish, but are also great in parfaits.

Sourdough Pancakes

Yield: 6 medium pancakes, 2 pancakes per serving

MAIN COURSE

INGREDIENTS

- 2 c. Sponge (active sourdough)
- 1 Tbsp. sugar
- ½ tsp. baking soda
- 1 egg
- 4 Tbsp. nonfat dry milk powder (optional)
- 1 Tbsp. water
- ½ tsp. salt

INSTRUCTIONS

In the evening or six to eight hours before using, set the sponge. When the sponge is bubbly and active, measure 2 c. for this recipe; save remaining for starter.

Add to the active sourdough sponge the egg, salt and sugar; beat with a fork to blend all ingredients. If you like, add nonfat dry milk powder (optional). Dissolve baking soda in water and stir the baking soda-water mixture into batter just before baking. Bake on a hot griddle. Turn once. Serve with hot brown sugar syrup or honey melted butter. Molasses, jelly, birch syrup or rose hip syrup are other tasty toppings.

If you prefer a thin pancake, add another egg or a bit more water; for a thicker cake, the sponge should have more flour. At the time of baking, the batter for sourdough should be the same consistency as the batter for the other hot cakes that are family favorites.

Tuna is an inexpensive protein that helps families extend their food dollars, but many complain that they are tired of the tuna casseroles that have been around for so long. Many state that they find it difficult to get their children to eat it. This particular recipe was developed for EFNEP by Dr. Carolyn Dunn, Department Head and Professor in the Department of Agricultural and Human Sciences at NC State University. It is used as a standard recipe to teach participants how to "Get the Best for Less" in the Families Eating Smart and Moving More curriculum.

My participants LOVE this recipe. They are surprised at how good it tastes. Even participants who stated they didn't like tuna at the beginning of the class shared they really liked this recipe. It is versatile and can be made using canned chicken as well. Participants like that they can add vegetables and spices to this recipe to make it their own.

Traditionally this dish is made with regular flank/minute stake (pounded), or ground beef/ground pork and with freshly made coconut milk along with locally grown produce (cherry tomatoes and long beans). As a part of our program promotion we've been conducting food demo's at our local grocery stores and have been trying to promote modified local recipes, which the Turkey Tinaktak is a great hit being that it is lower in total fat and sodium.

– Both our "educator's and our participants often say: They love it! And feel less guilty eating this dish because it's made much healthier using lite coconut milk and turkey instead of beef not to mention is made with less salt but still very tasty.

This recipe was created for our summer Kids in the Kitchen youth program. It is similar, yet different, from the very popular Calabacitas used in our Choose Health: Food, Fun, Fitness youth program. The children love the recipe even though it contains cooked spinach, which many say they don't like. Originally, I experimented with using canned spinach, but the spinach formed clumps and the overall appearance of the dish was not appetizing.

Quotes from individual children during the summer program included: "This spinach is sooo good.", "You are the best cook." (Spinach and Corn Sauté), "Keep making this I could eat this three meals a day." (Spinach and Corn Sauté), and "We should try this (Spinach and Corn Sauté) with kale." (Earlier in the program they massaged kale, which was used in a small individual salad each child made.)

EFNEP assistants used this recipe to help local food bank distribute more than 200 pounds of pinto beans. The food bank would distribute the beans and the participants would bring them back because they did not know what to do with dry beans. EFNEP stepped in to teach how to cook them and how to use them in this recipe. Samples were given and participants wanted the recipe and requested beans so they could make them at home.

Parents requested dry beans from the food bank because their children requested the Better Bars. They had tried for years to get their children to eat beans. They ate them in the Better Bars and loved them. EFNEP taught that making healthful snacks is cheaper than purchasing them. An EFNEP assistant's job is to show people how to use what foods they have to cook and to spend less money and still have tasty foods for their family.

"Easy Tin Can Ice Cream" was an exciting summer recipe and activity in the 4-H D.O.T. (Diet's Our Thing) curriculum of Auburn University EFNEP. Youth felt a sense of pride when they saw they could make their own ice cream. AU EFNEP youth had lots of fun with this recipe also. Due to its popularity, this recipe became a part of the "Katie Comes Calling" low-literacy publication series, with pictures, developed by an Extension specialist for the EFNEP audience. This recipe became so popular that it eventually was used in the traditional 4-H program in Alabama.

Clients really enjoy this recipe. It's been around for a long time and enjoyed by many. Clients like the fact they can use any low-fat, flavored yogurt and top it with fresh fruits and/or pecan or other nuts.

At the end of my lesson, we completed this recipe. One of the ladies wasn't a big fan of yogurt, several of us encourage her to try it. She did and really enjoyed it. She's been making yogurt pie ever since.
